

PRODUCT DESCRIPTION

- Designed to reach an IP67 waterproof rating
- Minimum dimensions for LED strips 10 mm wide
- Simple assembly
- Versatile application
- Low weight

FINISH :

Non anodized (raw) Silver anodized Black anodized RAL 

*Custom colors available upon request

TECHNICAL SPECIFICATION

Application

- intended mainly for interiors, e.g. lighting of cabinets, stairs, display windows etc. With their small size, the lighting fixtures can be concealed in the walls of the furniture with small cross-sections
- in the sealed version, it can be used outdoors, for example on the facade of buildings, in the elements of garden architecture, in fencing elements, etc.

Assembly

- can be mounted with appropriately selected fixing glues, professional double-sided adhesive tapes, metal and plastic mounting brackets, as well as mounting brackets with angle adjustment, and by means of a mounting spring

Additional information

- possibility of making a linear fixture with IP67 protection, which means the fixture is dustproof and waterproof
- achieving IP67 is possible with the following covers: LIGER, KA, HS, KA-PRO and KA-COM
- can be equipped with transparent and frosted covers (diffusers), aluminum-colored plastic end caps, metalized and conductive end caps
- must not be used for diodes emitting high temperatures
- space for LED strip: 11.2 mm

Profile bending Suitable for bending in the plane adjacent to the LED strip.

Minimum internal radius	Minimum external radius
150 mm	150 mm

- minimum radius - bending radius which when exceeded causes destruction (deformation, bending or lack of compatibility with other accessories, e.g. covers, end caps, etc.) of the profile
- internal radius - refers to the profile bent so that the cover is facing the inside of the arch
- external radius - refers to the profile bent so that the cover is facing the outside of the arch
- irregular curves are possible after consultation and individual quotation
- when bending anodized profiles, one should be aware of cracking of the anode coating (which may be more or less visible depending on the radius)

Line of light

- ✓ = Line of Light
- X = Visible dotting
